

Government Electrical Inspectorate (GEI) - The Electrical Safety Authority Having Jurisdiction (AHJ) over Electrical Installations in the Cooperative Republic of Guyana

The Guyanese Electrical Industry relies on the integrity and quality of Licensed Electrical Contractors. As a Licensed Electrical Contractor you must set an example of the qualities that Customers and the regulator would desire. The following ideology forms the basis of the Electrical Contractors code of Conduct.

- Value and always respect your clients.
- Respect others in the Electrical profession.
- No indecent language when conducting business at the Government Electrical Inspectorate Office.
- Maintain public safety by ensuring that your standard of workmanship is beyond reproach with all work complying with the National Electrical Code and Electricity Sector Regulations Act.
- Work safely with consideration for the welfare of fellow workmates.
- Be disciplined and organized in order to achieve planned results.
- Bring to the attention of the proper authorities the existence of any electrical conditions which are unsafe to life and property.
- Provide customers with the most energy efficient solution which will satisfy their specified needs. Remain abreast of improving solutions and new technologies.
- Constantly learn and improve working methods.
- Provide a minimum 12 months workmanship guarantee.
- Always provide a punctual service to customers and provide high level communication regarding site attendance.
- Provide reasonable assistance in cases of emergency, to fellow members, other contractors and members of the public.
- Remain professional when soliciting work from potential customers.
- Take pride in striving towards always to achieve new standards of excellence.
- Dutifully train, provide encouragement to, and support apprentices to improve work practices and raise the standard of the work performed in the Industry.
- Actively support, and at all times, preserve and uphold the reputation and brand image of Government Electrical Inspectorate (GEI) and the Electrical Contractors Association (ECA).
- Uphold the highest levels of safety, security and confidentiality for both your workers and the public.
- Ensure any grievance against the Association or another member is in accordance with the published dispute resolution procedure. Externally defend the integrity of your association and other members.
- Leave any workplace as you found it, in a clean, tidy, and safe condition.
- Be fully identifiable as an Electrical Contractor by carrying your Electrical Contractors Licence.
- Display this Code of Ethics openly in your place of business.
